Thanks Ron. Let me know what the isotopic results are. We aren't taking isotopic samples. On a related matter – is EPA compiling the Cabot test results into excel? If so, would you share that with DEP? I don't have the staff to transcribe the data and it makes life pretty difficult working off of PDFs.

Subject: Dimock - preliminary data results - high methane in two homes

Scott: I wanted to share with you that we have received preliminary results that show high levels of methane in two homes. One at 65,000 ug/l and one at 38,000 ug/l. We are still validating these numbers. We let the residents know that we have found high readings and that these are preliminary results - one mentioned that they received high results in the past. PADEP split samples with us for these two homes, so you may want to check your analytical results. The residents agreed that we could share this information with PADEP. The homes are **Ex. 6 - Personal Privacy**

Ex. 6 - Personal Privacy, respectively.

Let me know if you have any questions - please do not hesitate to contact me at 215-814-3170
